IACI 2026

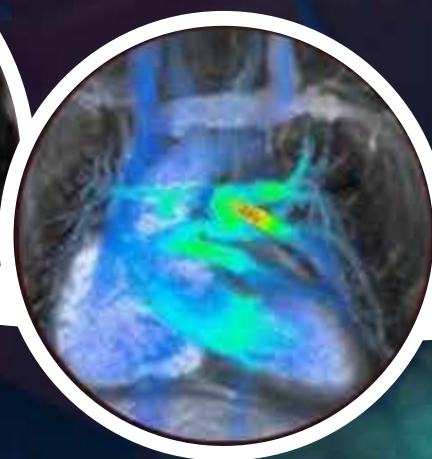

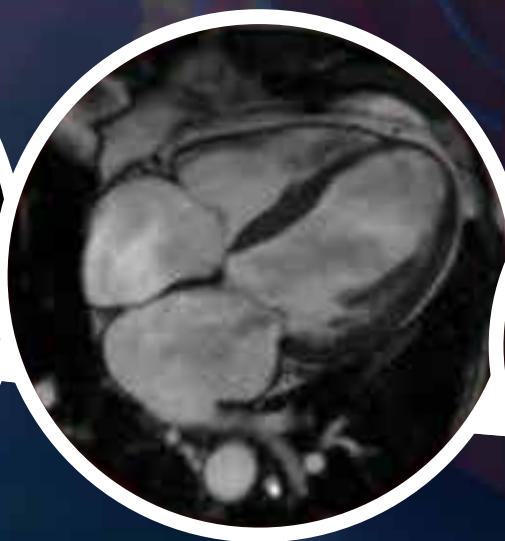

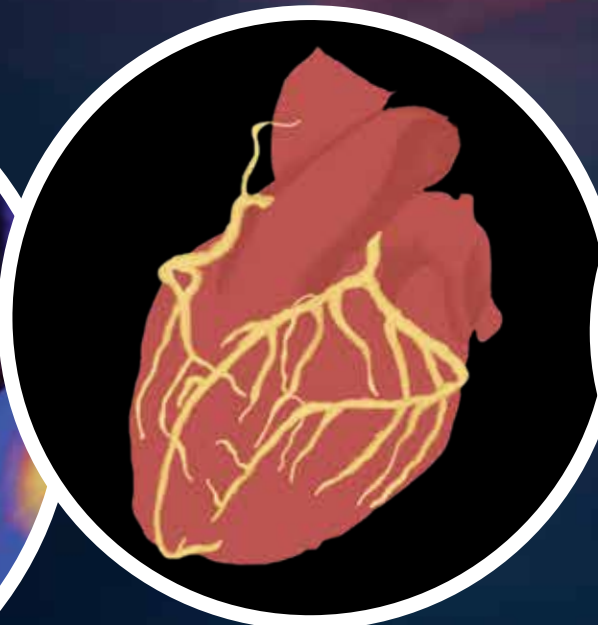

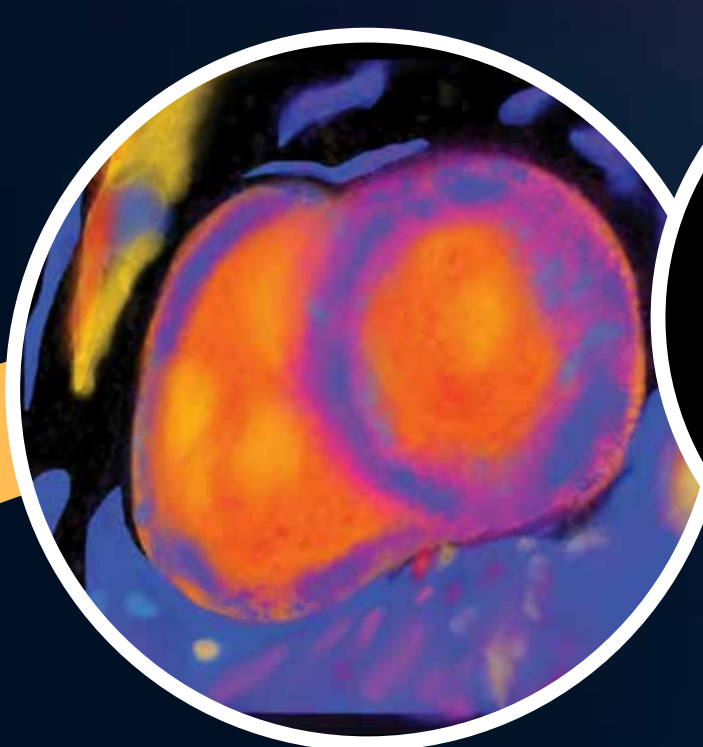

**16th ANNUAL CONFERENCE OF INDIAN
ASSOCIATION OF CARDIAC IMAGING 2026**

IACI 2026 **25 26 27**
SEPTEMBER, 2026

📍 Venue : Hotel Greenpark , Vadapalani

Theme : Redefining Cardiac Imaging - One beat at a time

Organized by :
**Indian Association of Cardiac Imaging (IACI) &
Barnard Institute of Radiology,
Madras Medical College**

Dear Esteemed Colleagues,

It is with great pleasure and anticipation that we announce the upcoming **National conference on Cardiac Imaging 2026** hosted by the “**Indian Association of Cardiac Imaging**” IACI at Chennai.

This is a much awaited annual event, and in 2026, Chennai takes the honour of hosting all our International and National experts in the field of Cardiac Radiology as well as all our eager delegates.

The conference is scheduled to take place on **25th, 26th & 27th of September 2026** at the **Hotel Green Park, Vadapalani Chennai**

This gathering promises to be a convergence of innovative ideas, groundbreaking technological advances, and case based discussions, aimed at fostering excellence in this complex domain. The workshop will feature interactive sessions designed to enhance knowledge and help in troubleshooting common caveats we face in day to day practice.

More specifics about speakers and the schedule will be available soon.

Stay tuned, Save the Date and Register Early! Looking forward to seeing you all,

With warm Regards,

BASIC Cardiac CT Workshop

Mastering the Essentials : From Physics to Practice

This intensive one-day workshop bridges the gap between technical acquisition and clinical interpretation. Participants will first gain access to an exclusive webinar covering the core pillars of CT: basic physics, patient preparation, and image optimisation. The hands-on session then translates this knowledge into practice, focusing on reporting high-impact clinical scenarios including calcium scoring, coronary anomalies, atherosclerotic disease, and the complexities of evaluating stents and bypass grafts.

BASIC CMR Workshop

A Comprehensive Guide to Cardiac MR

Designed for those beginning their journey in CMR, this workshop offers a structured learning path from theory to real-world application. Registered delegates receive access to a curated learner series—a deep dive into image acquisition and optimisation. This culminates in a full day of hands-on training where you will navigate "classic" clinical cases using world-class post-processing software, ensuring you leave with a confident approach to CMR interpretation.

Advanced Cardiac Imaging Workshop

The Cutting Edge: Innovation & Precision

Tailored for experienced imagers, this workshop explores the frontier of multimodality cardiac imaging. We shift focus to the newer technologies redefining the field, including:

- **Physiological Assessment** : CT FFR and quantitative myocardial perfusion (CT/MRI).
- **Advanced Morphology** : High-resolution plaque quantification.
- **Functional Mechanics** : Strain imaging and 4D flow.

Through interactive case-based discussions and live hands-on demonstrations, this session provides a deep dive into the future of precision diagnostics.

TEA BREAK

TIME

TOPIC

11:30 - 01:00 AM : SESSION 2 - CORONARY CT

11:30 - 11:45 AM

Rules of Engagement: Navigating the Latest Guidelines and Evidence for Coronary CT in stable and unstable chest pain

11:45 - 12:00 PM

Case-Based Face-Offs : CCTA vs Catheter angiography. How to improve CTCA reporting

12:00 - 12:15 PM

Imaging patients pre and post TAVR what every radiologist should know

Scientific Schedule

26th September 2026 | Saturday
HALL A (MAIN CONFERENCE HALL)

TIME

TOPIC

12:15 - 12:30 PM

Tiny Hearts, Beats Fast : How to master Pediatric Cardiac CT

12:30 - 12:45 PM

Current status and role of CTCA/Spect/CMR in coronary artery disease

12:45 - 01:00 PM

15 min Q and A

LUNCH BREAK

02:00 - 03:30 AM : SESSION 3

02:00 - 02:15 PM

CT-Guided PCI & Revascularisation- New Frontier in CTCA

02:15 - 02:30 PM

Beyond the Lumen: The Present Realities & Future Horizon of CT-FFR- CFD and AI

02:30 - 02:45 PM

Beyond Vision: AI-based Quantitative assessment of CT Coronary Angiography

02:45 - 03:00 PM

The Essential Trials- Cardiac Imagers Need to Know
